

1500 RPM Type GP 165DZ

Engine: BF6M1013EC **Alternator:** ECP34-2L/4

These are the characteristics of the BF6M1013EC

Water cooled 6 cylinder in-line engine.

T urbocharging and turbocharging with charge air cooling. Displacement: 1.2 l/cylinder.

Modern high-pressure fuel injection system with single injection pumps.

Electronic governor (option).

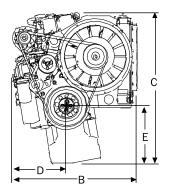

All servicing points on one side.

Compact design and low weight.

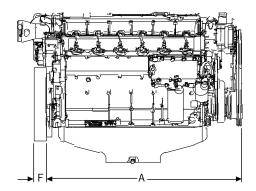

Your benefits:

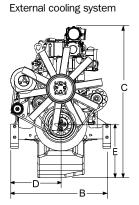

- Low noise radiation. This eliminates the need for costly noise attenuation measures.
- Exemplarily low fuel and oil consumption, long service intervals save operating costs.
- Easy and cost-effective installation with minimum weight and small space requirement.
- Outstanding load acceptance ensures immediate power supply.
- Incomparably low exhaust emission, meets all industial exhaust regulations.
- Global service network with over 1,000 locations.

100 % load	g/kWh lb/hp-hr	198 0.326	
75 % load	g/kWh lb/hp-hr	199 0.327	
50 % load	g/kWh lb/hp-hr	202 0.332	

Scope of Supply:

The engine and the alternator are mounted together forming a rigid monoblock, the shafts are connected by a flexible disc connection. The monoblock is mounted on a steel base frame via silent blocks. The base frame is including a fuel tank. Starting is electric and it includes a battery. The genset monitoring system consist of a control module.

PRP* Kva/KW:

Available electrical power (at a variable load) with a medium of 80% of the indicated maximum power. A 10% overload capability is available LTP** Kva/KW:

Available electrical load (at a variable load) during a maximum of 500 hours per year. No overload capability is available.

Standard specification

Standard engine: Connection housing SAE 2, with flywheel 10"/11.5

Cooling system: Cooling system HAT, depending on engine version incl. charge air cooler, pressure fan.

Exhaust system: Without silencer, with counterflange for exhaust system on the turbocharger.

Filter: Lube oil filter, air filter depending on engine version loose as kit or assembled.

Engine electrics: 12 Volt version, electrical engine governor standard in 6-cylinder FC engines.

Governor: Mechanical standard, optional electronic governor.

Miscellaneous: Painted dark gray.

CONTROL PANEL

Manual or automatic start control panel

Manual or automatic remote boot controller, selector switch for Off, Man and Auto with the key.

Complete motor protection functions with alarms visualized via LEDs in the front.

The control unit 6 is set via DIP switches in the rear part of the case.

Standard circuit breaker and differential relay.

▶ Engine description

Type of cooling: Liquid cooling, thermostatically controlled, charge-air-cooled engines with air-to-air

charge air cooler

Crankcase: High grey cast iron crankcase, for monobloc construction

Crankcase breather: Closed-circuit crankcase breather

Cylinder head: Grey cast iron block-type cylinder head

Valve arrangement/

timing: One inlet and one exhaust valve per cylinder, actuated via

tappets, push rods and rocker arms, camshaft driven by geartrain

Piston: Three-ring piston, two compression rings and one oil scraper ring

Piston cooling: Oil cooled with spray nozzles (channel-cooled piston)

Connecting rod: Forged steel rod

Crankshaft bearings: Tri-metal plain bearings
Crankshaft: With integral counterweights

Camshaft: Forged steel shaft

Lubrication system: Forced-feed circulation lubrication with gear pump

Lube oil cooler: Oil cooler integrated in coolant circuit

Lube oil filter: Paper-type microfilter as replaceable-cartridge full flow filter

Injection pump/

governor: Single injection pumps for each cylinder integrated in crankcase

Mechanical centrifugal governor (standard); electronic governor (EMR) optional

Fuel lift pump: Integrated in belt drive

Injection nozzle: Six-hole nozzle

Fuel filter: Replaceable cartridge

Alternator: Three-phase alternator 12 V or 24 V

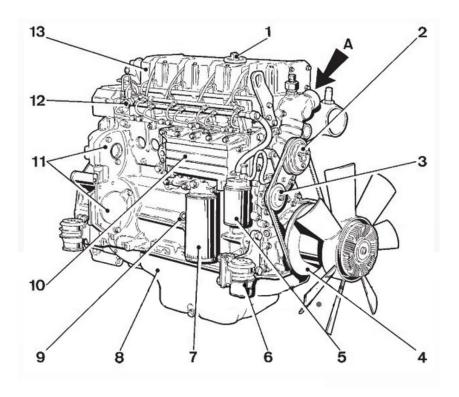

Starter motor: 12 V or 24 V

Heating system: Optional connection for cab heating to engine cooling circuit

Identification of engine parts

Service side BF6M1013EC

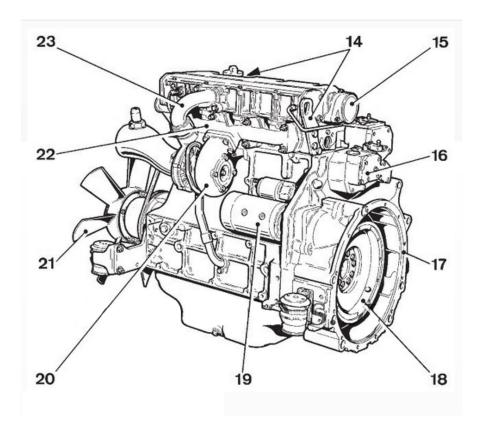

- Oil filler cap
 Pumps for coolant
 Fuel pump
 Damper
 Replacement filter for lubricating oil
 Engine Mount
 Replacement fuel filter
 Sump
 Oil dipstick
 Oil cooler
 The element 11 for connecting the hydraulic pump
 Pipeline to drain fuel leaking from the valve to maintain the pressure pressure 13 Cylinder head

Identification of engine parts

Starter side BF6M1013EC

- 14 The transport device
- 15 Air valve housing
- 16 Speed controller
- Housing SAE 17
- 18 Flywheel
- 19 Starter
- 20 Turbocharger working on exhaust
- 21 Fan
- 22 Exhaust manifold
